PREFACE

HYPERLINK FEATURE

The digital version of this report has been hyperlinked. Click on the title of a section or a table in the List of Tables and you will be automatically directed to the actual content section or table in the report.

This report provides the detailed results for each question from the 2024-25 *California Healthy Kids Survey* (CHKS) for schools within this school district. The CHKS, along with its two companion surveys—the *California School Staff Survey* (CSSS) and the *California School Parent Survey* (CSPS)—form the California Department of Education’s *California School Climate, Health, and Learning Survey* (CalSCHLS) System. CalSCHLS is the largest, most comprehensive state effort in the nation to regularly assess students, staff, and parents to provide key data on school climate and safety, learning supports and barriers, stakeholder engagement, and youth development, health, and well-being. Exhibit 1, at the end of the Preface, presents the major domains and constructs assessed by CalSCHLS. Appendix I lists the schools that administered the survey in the district and their response rates; Appendix II provides more information about CHKS questions.

These surveys grew out of the California Department of Education’s (CDE) commitment to helping schools create more positive, safe, supportive, and engaging environments and to promoting the successful cognitive, social, emotional, and physical development of all students. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, parent involvement, and addressing the needs of vulnerable groups.

Factsheets, guidebooks, and other resources to help in understanding and using CHKS results are available for downloading from the CalSCHLS website (calschls.org). The California Safe and Supportive Schools website (ca-safe-supportive-schools.wested.org) provides information and tools helpful in implementing effective strategies to address the needs identified by the survey.

The CalSCHLS technical advisor team offers data workshops and coaching to help identify local needs and develop action plans to meet those needs.

THE SURVEY

CDE has funded the CHKS since 1997 to provide data to assist schools in: (1) fostering safe and supportive school climates, social-emotional competencies, and engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. A thorough understanding of the scope and nature of student behaviors, attitudes, experiences, and supports is essential for guiding school improvement and academic, prevention, and health programs. Appendix II is a brief guide to key CHKS Core Module indicators designed to help survey users more easily understand and interpret their findings.

The CHKS is not just a standalone instrument but a data collection system that districts can customize to meet local needs and interests. The secondary-school CHKS consists of a required general Core Module and a series of optional, supplementary topic-focused modules that districts can elect to administer.

Districts may also add their own questions of local interest in a custom module. Table 1 indicates the modules administered by the district/school.

Core Module

As summarized in Appendix II, the Core Module consists of key questions that are considered most important for schools to guide improvement of academic, health, and prevention programs and promote student achievement, college and career readiness, positive development, and well-being. The majority of the questions are school-specific, including the following indicators:

- student grades, truancy, boredom at school, attendance, academic motivation, and school connectedness, as indicators of engagement;
- developmental supports (protective factors) that promote positive academic, social, and emotional outcomes: experiences of caring adult relationships, high expectations, and opportunities for meaningful participation at school;
- perceived school safety, bullying, and victimization; and
- violence perpetration, substance use, and crime-related behavior (e.g., weapons possession).

The Core Module also assesses indicators of student well-being in general, including the scope and nature of substance use and mental health and wellness (chronic sadness, social and emotional distress, life satisfaction, and contemplation of suicide). These questions provide insight into important barriers to learning and development.

A wide range of demographic questions help districts identify differences among student groups and to better address the needs of significant and vulnerable students, including those required to be included in LCAP efforts. These include differences in the results related to race/ethnicity, gender, sexual orientation, and socioeconomic status; homeless and foster status; and English language proficiency.

Behavioral Health Module (Supplementary)

The Behavioral Health Module (BHM) is a multiform survey module that assesses secondary student well-being indicators (i.e., social isolation, body image and disordered eating, responses to trauma, stress-associated health conditions, and precursors to and consequences of substance use) and protective factors (i.e., home adult supports, peer supports, and school mental health supports). This module assesses almost all of the measures that were assessed on the 2022-23 Mental Health Supports Module, Student Trauma Module, and Alcohol and Other Drugs (AOD) Module—which have been discontinued. The BHM assesses more content while minimizing the survey length for individual students by using a multiform instrument. Students are randomly administered one of two BHM survey forms to reduce survey burden and collect representative data on more aspects of behavioral health. Because the BHM is administered to all schools participating in the Biennial State CHKS, statewide comparison data will be available for all BHM results.

School Climate Module (Supplementary)

To further support school improvement efforts and the LCAP process, a supplementary School Climate Module is available. It provides additional data on student academic mindset, school academic supports, discipline/order, supports for social-emotional learning, bullying prevention, peer relationships, respect for diversity, and the quality of the physical environment (calschls.org/survey-administration/downloads).

Social Emotional Health Module (Supplementary)

The Social Emotional Health Module (SEHM) greatly enhances the value of the CHKS as a strength-based assessment of positive emotions, engagement, ability to build and maintain relationships, and other social-

emotional capacities linked to student mental health and well-being and academic success. It includes 43 items that capture core adolescent psychological assets. The combination of the SEHM and Core Module yields a comprehensive set of data to inform decisions about mental health and social-emotional learning programs.

SURVEY ADMINISTRATION AND SAMPLE

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Each student’s participation was voluntary, anonymous, and confidential.

- Table A1.1 describes the target sample of students and the final number and percent of students who completed the survey (the participation response rate).
- Appendix I lists all the secondary schools in the district that were eligible to participate in the survey and the percentage of their enrolled students that completed the survey (included in the district report).

THE REPORT

The report tables, organized by topic, provide the percentage of students that responded to each question response option by grade level. Percentages are rounded to the nearest whole number.

LCAP Subgroup Results

Summary tables provide key findings (e.g., safety, school connectedness, bullying and harassment, developmental supports) disaggregated by each of the LCAP subgroups (race/ethnic subgroups, socioeconomically disadvantaged students, English learners and long-term English learners, students with disabilities, students in foster care, and unhoused youth). Results are also disaggregated by gender. Districts can subscribe to the District CalSCHLS data dashboard to disaggregate their CHKS results by these and other factors (i.e., students who report different levels of caring relations with adults at school).

ONLINE DATA DASHBOARDS

Public Dashboard. Anyone can examine online key state, county, and district CHKS results on the public CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard). The dashboard can be used to graphically display statewide, county, and district key indicators from the Core and School Climate Modules, trends over time, and disparities in survey outcomes across subgroups. Group differences across LCAP subgroups and other characteristics (e.g., chronic sadness) can be examined. In addition to displaying results interactively on the web, dashboard results can be exported as Image and PDF files for dissemination. District data are publicly posted on the dashboard by the end of November of the year following survey administration.

The District Dashboard Option. Districts may also purchase a two-year subscription to a password-protected, private data dashboard that displays up to 11 years of CalSCHLS data at not only the district level but also the *individual school level*. The dashboard provides designated staff with graphical data displays for the district as a whole, for all schools in the district on the same page to enable comparisons across schools, and for a single, individual school. At both the district and school level, viewers can:

- compare their data with district and state averages;

- make comparisons across groups such as race/ethnicity, sexual orientation, gender identity, and many other characteristics (LCAP subgroups, chronic sadness, caring relationships); and
- examine data trends over time overall and by different demographic groups.

Viewers at both the district level and the school level have the option to download data displays as a PDF document which can be shared with stakeholders.

UNDERSTANDING THE DATA

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. These include changes that occur in survey content, administration, and/or sample characteristics between administrations. The following are a few of the key issues that should be kept in mind.

Representativeness

Among the most important factors affecting the quality of survey results is the level and type of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 70 percent (see Table A1.1 and Appendix I for student response rates). One indication of the survey's representativeness is how accurately the sample reflects the gender and ethnic composition of the student enrollment. Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

Changes Between Survey Administrations

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or size of the sample of students who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase during holidays or social events).

RESOURCES

CalSCHLS.org contains numerous guidebooks and other resources for using and understanding survey results.

- CHKS **factsheets** analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level (calschls.org/resources/factsheets).
- *Making Sense of School Climate* provides a discussion of CalSCHLS survey items that relate to school climate (data.calschls.org/resources/S3_schoolclimateguidebook_final.pdf).
- The **California Center for School Climate** (ccsc.wested.org) website houses school climate resources and guides, and archived virtual events.
- The *California Safe and Supportive Schools Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on ca-safe-supportive-schools.wested.org/subscribe/.
- CDE's **California Safe and Supportive Schools** website (ca-safe-supportive-schools.wested.org) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.

- The **CalSCHLS Item Crosswalk** (calschls.org/resources/#resources_and_tools) is a handy table listing all the constructs and questions that are on two or more of the CalSCHLS surveys, along with the report table number where results can be found, to assist in the comparison of findings among students, staff, and parents.

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process of continuous improvement. The following describes some additional steps you should take and some custom services (additional fees apply) available from the CalSCHLS technical advisor team. These will help in fostering effective use of the results and provide additional information to support school and program improvement efforts and the LCAP process.

Engage Students, Staff, and Parents in Reviewing the Results and Action Planning

Engage students, parents, and school/community stakeholders in reviewing and exploring the meaning of the results. Obtain their input into how the school might better meet the identified school and student needs and into developing a detailed action plan to guide school/community collaborative efforts. This communicates to stakeholders that you value their input into how to improve the school/community and gives them an opportunity for meaningful participation. By enlisting their collaboration, you also increase the prospect that the identified needs will be successfully addressed.

As part of this process, WestEd staff can facilitate a *Data Workshop* designed to identify local needs based on the survey results and engage adult stakeholders in developing a detailed plan and timetable for meeting those needs using evidence-based strategies. For more information, contact your CalSCHLS technical advisor (calschls.org/contact) or email calschls@wested.org.

Compare Results with Other Data

The value of your CHKS results will be greatly enhanced if examined in the context of the following sources of related data.

- **Staff and Parent Surveys.** If your school district has administered the CalSCHLS school staff and parent surveys, obtain these results and compare them to those provided by students. It is important to determine how consistent are student, staff, and parent perceptions and experiences. To facilitate these comparisons, the CalSCHLS Survey Item Crosswalk (calschls.org/resources/#resources_and_tools) lists all the constructs and questions that are on two or more of the CalSCHLS surveys, along with the report table number where results can be found. If your district did not administer these companion surveys, urge them to do so next time.
- **Elementary CHKS Results.** Examine how the results from 9th and 11th graders compare with those from 5th and 7th graders if your district also administered the CHKS at these school levels. The elementary, middle, and high school surveys contain common indicators that will enable you to gain a sense of the developmental trajectory in these indicators and explore what programs at the elementary and middle school levels might help mitigate problems that are evident among older students.
- **Other Data.** Examine how the results compare with other youth data collected within the district that relate to the variables assessed. Other relevant school-related data include discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.

- **Similar District and Statewide Results.** The results from the biennial state administration of the CHKS, which provide representative state norms, can be downloaded from the CalSCHLS website (data.calschls.org/resources/Biennial_State_1921.pdf) or examined on the CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard). If there is a school district that you consider similar to your own, you can also check to see if they have administered the survey and download the results for comparison (calschls.org/reports-data/search-lea-reports). How you compare to state and district results can provide some context for your results, but the most important consideration is what your own results say about the students in your school/community.

Data Workshop

To assist in your review of the survey results, you can request your CalSCHLS technical advisor to conduct a structured, customized *Data Workshop*. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies. For more information, contact your CalSCHLS technical advisor (calschls.org/contact) or email calschls@wested.org.

Request Additional Reports and Data

As you review your data with stakeholders, you may find that additional data needs emerge. The following custom services are available to help delve more deeply into your survey results and foster more effective use of the results in support of school and program improvement efforts and the LCAP process.

School Reports, School Climate Report Cards, Mental Health Reports, and School Boredom Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school. Four types of reports are available:

- A full report with all the survey results
- A short, user-friendly, graphic **School Climate Report Card** that provides trends across key indicators of school climate and provides two-year state averages on those indicators (calschls.org/reports-data/#slcr)
- A graphic **Mental Health Report** that describes key indicators of mental health by grade level and by survey administration year (calschls.org/reports-data/#slcr)
- A **School Boredom Report** that describes how much students value school and how bored they feel at school (calschls.org/reports-data/#slcr)

Disaggregated Reports

CalSCHLS staff can produce full reports that look at how results vary by demographic subgroups (e.g., race/ethnicity), or by other characteristics of youth, such as those who are low in academic motivation compared to those who are high. This can be valuable for identifying what subgroups need to be targeted with what resources and programs. Given the LCAP requirement that districts identify and address the needs of underserved subgroups, doing this would be a natural next step for addressing subgroup disparities.

Additional Analysis of Data

The complete dataset is available electronically for additional analysis (calschls.org/reports-data). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different

subgroups of students and across schools within a district. You can also request an analysis by WestEd staff of any topic of interest.

Add Questions to Your Next Surveys

Determine what additional information is needed from students to guide school improvement efforts and add questions to your next CHKS, staff, or parent surveys. All three surveys are designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

For more information about survey planning or technical assistance in understanding survey results and developing effective action plans to address identified needs, call the CalSCHLS helpline (562.799.5460) or email calschls@wested.org.

Core Module Results

1. Survey Sample

Table A1.1

Student Sample for Core Module

	Grade 7	Grade 9	Grade 11	NT ^A
<i>Student Sample Size</i>				
Target sample	135	–	–	–
Final number	77	–	–	–
Response Rate	57%	–	–	–

Note: ^ANT includes continuation, community day, and other alternative school types.

Table A1.2

Number of Respondents by Instructional Model

	Grade 7	Grade 9	Grade 11	NT
In-school learning only	77	–	–	–
Remote learning only	0	–	–	–

2. Summary of Key Indicators

Table A2.1

Key Indicators of School Climate

	Grade 7 %	Grade 9 %	Grade 11 %	NT %	Table
School Engagement and Supports					
School connectedness [†]	67	–	–	–	A6.4
School connectedness ^{†ψ} (<i>Remote Only</i>)		–	–	–	A6.4
Academic motivation [†]	66	–	–	–	A6.4
School is really boring [±]	34	–	–	–	A6.11
School is worthless and a waste of time [±]	14	–	–	–	A6.11
Current absenteeism (≥3 times) [¶]	14	–	–	–	A6.2
Trouble focusing on schoolwork ^σ	46	–	–	–	A6.10
Caring adult relationships [‡]	67	–	–	–	A6.4
High expectations [‡]	76	–	–	–	A6.4
Meaningful participation [‡]	30	–	–	–	A6.4
Facilities upkeep ^σ	55	–	–	–	A6.15
Promotion of parental involvement in school [†]	59	–	–	–	A6.4
School Safety and Cyberbullying					
School perceived as very safe or safe	56	–	–	–	A8.1
Experienced any harassment or bullying [§]	48	–	–	–	A8.2
Had mean rumors or lies spread about you [§]	43	–	–	–	A8.3
Been afraid of being beaten up [§]	22	–	–	–	A8.3
Been in a physical fight [§]	21	–	–	–	A8.4
Seen a weapon on campus [§]	10	–	–	–	A8.6
Cyberbullying [§]	32	–	–	–	A8.3

Notes: Cells are empty if there are less than 10 respondents.

[†] Average percent of respondents reporting “Agree” or “Strongly agree” across survey questions that comprise the scale.

^ψ The scale was based on four questions for remote respondents.

[±] Rating of 7 or higher.

[¶] Past 30 days.

^σ Percent of respondents reporting “Agree” or “Strongly agree.”

[‡] Average percent of respondents reporting “Pretty much true” or “Very much true” across survey questions that comprise the scale.

[§] Past 12 months.

Table A2.2**Key Indicators of Substance Use, Health Routines, and Remote Schooling**

	Grade 7 %	Grade 9 %	Grade 11 %	NT %	Table
Substance Use					
Current alcohol or drug use [¶]	3	–	–	–	A9.5
Current tobacco use [¶]	1	–	–	–	A10.8
Current marijuana use [¶]	0	–	–	–	A9.5
Current binge drinking [¶]	1	–	–	–	A9.5
Very drunk or “high” 7 or more times, ever	0	–	–	–	A9.7
Been drunk or “high” on drugs at school, ever	0	–	–	–	A9.9
Current cigarette smoking [¶]	1	–	–	–	A10.5
Current use of vape products [¶]	1	–	–	–	A10.6
Current tobacco vaping [¶]	0	–	–	–	A10.6
Current marijuana vaping [¶]	0	–	–	–	A10.6
Health Routines					
Eating of breakfast [‡]	68	–	–	–	A4.1
Bedtime (at 12 am or later)	16	–	–	–	A4.2
Remote Schooling					
Remote learning frequency (5 days per week) ^{¶δ}		–	–	–	A5.1
Synchronous instruction (4 days or more) ^{‡δ}		–	–	–	A5.1
Interest in schoolwork done from home ^{σδ}		–	–	–	A5.3
Meaningful opportunities ^{θδ}		–	–	–	A5.2

Notes: Cells are empty if there are less than 10 respondents.

[¶]Past 30 days.

[‡]Today.

^δRemote only.

[‡]Past 7 days.

^σPercent of respondents reporting “Agree” or “Strongly agree.”

^θPercent of respondents reporting “Pretty much true” or “Very much true.”

Table A2.3**Key Indicators of Student Well-Being**

	Grade 7 %	Grade 9 %	Grade 11 %	NT %	Table
Social and Emotional Health					
Social emotional distress [‡]	31	–	–	–	A7.5
Experienced chronic sadness/hopelessness [§]	33	–	–	–	A7.1
Considered suicide [§]	14	–	–	–	A7.2
Optimism [‡]	48	–	–	–	A7.3
Life satisfaction [‡]	65	–	–	–	A7.4
	Grade 7	Grade 9	Grade 11	NT	
California Student Wellness Index [∘]	100.9	–	–	–	NP

Notes: Cells are empty if there are less than 10 respondents.

[‡]Average percent of respondents reporting “Pretty much true” or “Very much true” across survey questions that comprise the scale.

[§]Past 12 months.

[‡]Average percent of respondents reporting “Satisfied” or “Very satisfied” across survey questions that comprise the scale.

[∘]To construct the index, the ten items that comprise both the social emotional distress and life satisfaction scales were each recoded such that the lowest possible score on each item was zero. These scores were then added together, resulting in a total raw score that could vary between 0 and 40. To calculate the scale score for the Student Wellness Index, the raw score was divided by the maximum possible score (40). Additionally, for clearer comparisons across groups and for interpreting future trends across time, a standardized version of the Student Wellness Index was constructed based on statewide data from the 2021-23 Biennial State CHKS. The standardized score (presented in the table) is scaled to have a mean score of 100 and a standard deviation of 15.

NP-Not presented in an individual table.

3. Demographics

Table A3.1

School Schedule, Past 30 Days

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
In-School Model	100	–	–	–
Remote Learning Model	0	–	–	–

Question HS/MS A.1: Which of the following best describes your school schedule during the past 30 days?

Notes: Cells are empty if there are less than 10 respondents.

In-School Model - Respondents selecting “I went to school in person at my school building for the entire day, Monday through Friday.”

Remote Learning Model - Respondents selecting “I participated in school from home for the entire day on most or all weekdays and did not go to school in person.”

Table A3.2

Gender of Sample

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Male	55	–	–	–
Female	43	–	–	–
Nonbinary	1	–	–	–
Something else	1	–	–	–

Question HS/MS A.3: What is your gender?

Note: Cells are empty if there are less than 10 respondents.

Table A3.3

Gender Identity

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No, I am not transgender	95	–	–	–
Yes, I am transgender	0	–	–	–
I am not sure if I am transgender	4	–	–	–
Decline to respond	1	–	–	–

Question HS/MS A.4: Some people describe themselves as transgender when how they think or feel about their gender is different from the sex they were assigned at birth. Are you transgender?

Note: Cells are empty if there are less than 10 respondents.

Table A3.4***Sexual Orientation***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Heterosexual (straight)	79	–	–	–
Lesbian or Gay	1	–	–	–
Bisexual	4	–	–	–
Something else	4	–	–	–
Not sure	5	–	–	–
Decline to respond	7	–	–	–

Question HS/MS A.5: Which of the following best describes you?

Note: Cells are empty if there are less than 10 respondents.

Table A3.5***Race or Ethnicity***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
American Indian or Alaska Native, non-Hispanic	1	–	–	–
Asian or Asian American, non-Hispanic	1	–	–	–
Black or African American, non-Hispanic	0	–	–	–
Hispanic or Latino/a	35	–	–	–
Native Hawaiian or Pacific Islander, non-Hispanic	1	–	–	–
White, non-Hispanic	45	–	–	–
Multiracial, non-Hispanic	11	–	–	–
Something else, non-Hispanic	5	–	–	–

Question HS/MS A.6: What is your race or ethnicity? (Mark All That Apply)... American Indian or Alaska Native... Asian or Asian American... Black or African American... Hispanic or Latino/a... Native Hawaiian or Pacific Islander... White... Something else.

Note: Cells are empty if there are less than 10 respondents.

Table A3.6***Living Arrangements and Housing Status***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
A home with one or more parent or guardian	95	–	–	–
Other relative’s home	3	–	–	–
A home with more than one family	3	–	–	–
Friend’s home	0	–	–	–
Foster home, group care, or waiting placement	0	–	–	–
Hotel or motel	0	–	–	–
Shelter, car, campground, or other transitional or temporary housing	0	–	–	–
Other living arrangement	0	–	–	–

Question HS/MS A.9: What best describes where you live? A home includes a house, apartment, trailer, or mobile home.

Note: Cells are empty if there are less than 10 respondents.

Table A3.7***Living Situation***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Home with one or more parent or guardian	95	–	–	–
Foster home	0	–	–	–
Homeless	0	–	–	–
Other living arrangement	5	–	–	–

Question HS/MS A.9: What best describes where you live? A home includes a house, apartment, trailer, or mobile home.

Notes: Cells are empty if there are less than 10 respondents.

Category “Homeless” includes “Friend’s home,” “Hotel or motel,” and “Shelter, car, campground, or other transitional or temporary housing.”

Category “Other living arrangement” includes “Other relative’s home,” “A home with more than one family,” and “Other living arrangement.”

Table A3.8***Parental Education***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Did not finish high school	1	–	–	–
Graduated from high school	14	–	–	–
Attended college but did not complete four-year degree	16	–	–	–
Graduated from college	49	–	–	–
Don't know	20	–	–	–

Question HS/MS A.10: What is the highest level of education your parents or guardians completed? (Mark the educational level of the parent or guardian who went the furthest in school.)

Note: Cells are empty if there are less than 10 respondents.

Table A3.9***Special Education Services***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	73	–	–	–
Yes	1	–	–	–
Don't know	25	–	–	–
Prefer not to say	1	–	–	–

Question HS/MS A.15: Do you have an IEP (Individualized Education Plan) or get special education services?

Note: Cells are empty if there are less than 10 respondents.

Table A3.10***English Learner Program Designation***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	75	–	–	–
Yes	4	–	–	–
Don't know	21	–	–	–

Question HS/MS A.13: Are you in the English Learner Program at school?

Note: Cells are empty if there are less than 10 respondents.

Table A3.11***English Learner (EL) Program Duration and Long-Term English Learner (LTEL) Status***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Not currently in English Learner Program	95	–	–	–
Less than 7 years (EL)	3	–	–	–
7 years or more (LTEL)	2	–	–	–

Question HS/MS A.13, 14: Are you in the English Learner Program at school?... How many years have you been in the English Learner Program across all schools you've attended?

Notes: Cells are empty if there are less than 10 respondents.

Category "Less than 7 years (EL)" includes responses "Less than 3 years," "3 to 4 years," and "5 to 6 years."

Table A3.12***Language Spoken at Home***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
English	88	–	–	–
Spanish	9	–	–	–
Mandarin	0	–	–	–
Cantonese	0	–	–	–
Taiwanese	0	–	–	–
Tagalog	0	–	–	–
Vietnamese	1	–	–	–
Korean	0	–	–	–
Arabic	0	–	–	–
Other	1	–	–	–

Question HS/MS A.12: What language is spoken most of the time in your home?

Note: Cells are empty if there are less than 10 respondents.

Table A3.13

English Language Proficiency Among Students Speaking a Language Other Than English at Home

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
<i>How well do you...</i>				
understand English?				
Very well		—	—	—
Well		—	—	—
Not well		—	—	—
Not at all		—	—	—
speak English?				
Very well		—	—	—
Well		—	—	—
Not well		—	—	—
Not at all		—	—	—
read English?				
Very well		—	—	—
Well		—	—	—
Not well		—	—	—
Not at all		—	—	—
write English?				
Very well		—	—	—
Well		—	—	—
Not well		—	—	—
Not at all		—	—	—
<i>English Language Proficiency Status</i>				
Proficient		—	—	—
Not proficient		—	—	—

Question HS/MS A.12, 12A-12D: What language is spoken most of the time in your home?... How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions: how well do you understand... speak... read... and write English? Response options are reverse coded so higher values indicate higher English proficiency level (“Not at all” (1); “Not well” (2); “Well” (3); and “Very well” (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as “Proficient” or “Not Proficient” based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.14***Number of Days Attending Afterschool Program***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
I do not attend my school's afterschool program	91	–	–	–
1 day	0	–	–	–
2 days	0	–	–	–
3 days	1	–	–	–
4 days	0	–	–	–
5 days	8	–	–	–

Question HS/MS A.19: How many days a week do you usually go to your school's afterschool program?

Note: Cells are empty if there are less than 10 respondents.

Table A3.15***Military Connections***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	72	–	–	–
Yes	27	–	–	–
Don't know	1	–	–	–

Question HS/MS A.11: Is your father, mother, or guardian currently in the military (Army, Navy, Marines, Air Force, National Guard, or Reserves)?

Note: Cells are empty if there are less than 10 respondents.

4. Health Routines

Table A4.1

Eating of Breakfast

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	32	–	–	–
Yes	68	–	–	–

Question HS/MS A.17: Did you eat breakfast today?

Note: Cells are empty if there are less than 10 respondents.

Table A4.2

Bedtime

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Before 7:00 pm	1	–	–	–
7:00-7:59 pm	4	–	–	–
8:00-8:59 pm	14	–	–	–
9:00-9:59 pm	27	–	–	–
10:00-10:59 pm	27	–	–	–
11:00-11:59 pm	11	–	–	–
12:00-12:59 am	11	–	–	–
After 1:00 am	5	–	–	–
<i>Bedtime at 12 am or later</i>	16	–	–	–

Question HS/MS A.16: What time did you go to bed last night?

Note: Cells are empty if there are less than 10 respondents.

5. Remote Schooling

Results in this section are applicable to students who indicated that they attend school remotely. Responses from students attending school in-person are not included.

Table A5.1

Remote Schooling Schedule and Instructional Time (Remote Only)

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Time spent on learning and completing schoolwork from home on the average weekday				
Less than 1 hour		—	—	—
Between 1 and 2 hours		—	—	—
Between 2 and 3 hours		—	—	—
Between 3 and 4 hours		—	—	—
Between 4 and 5 hours		—	—	—
More than 5 hours		—	—	—
Number of days in the past week participating in an online class from home where your teacher talked to students				
0 days		—	—	—
1 day		—	—	—
2 days		—	—	—
3 days		—	—	—
4 days		—	—	—
5 days		—	—	—
Number of weekdays participating in school from home for the entire school day				
0 days		—	—	—
1 day		—	—	—
2 days		—	—	—
3 days		—	—	—
4 days		—	—	—
5 days		—	—	—

Question HS/MS A.20-22: In the past 30 days, how many weekdays in an average week did you participate in school from home for an entire school day?.. On the average weekday, how much of your day did you spend learning and completing schoolwork from home?... How many days in the past week did you participate in an online class from home where your teacher talked to students from a computer, phone, or tablet (iPad)?

Note: Cells are empty if there are less than 10 respondents.

Table A5.2***Interesting Activities Provided for Student in Remote Schooling (Remote Only)***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Not at all true		–	–	–
A little true		–	–	–
Pretty much true		–	–	–
Very much true		–	–	–

Question HS/MS A.49: There is a teacher or some other adult from my school... who provides me with interesting activities to do while I am participating in school from home.

Note: Cells are empty if there are less than 10 respondents.

Table A5.3***Interest in Schoolwork Done from Home (Remote Only)***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Strongly disagree		–	–	–
Disagree		–	–	–
Neither disagree nor agree		–	–	–
Agree		–	–	–
Strongly agree		–	–	–

Question HS/MS A.40: How strongly do you agree or disagree with the following statements?... I am interested in the schoolwork I do when participating in school from home.

Note: Cells are empty if there are less than 10 respondents.

6. School Performance, Engagement, and Supports

Table A6.1

Grades, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Mostly A's	49	–	–	–
A's and B's	29	–	–	–
Mostly B's	4	–	–	–
B's and C's	11	–	–	–
Mostly C's	3	–	–	–
C's and D's	3	–	–	–
Mostly D's	1	–	–	–
Mostly F's	0	–	–	–

Question HS/MS A.24: During the past 12 months, how would you describe the grades you mostly received in school?

Note: Cells are empty if there are less than 10 respondents.

Table A6.2

Absences, Past 30 Days

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
I did not miss any days of school in the past 30 days	59	–	–	–
1 day	18	–	–	–
2 days	9	–	–	–
3 or more days	14	–	–	–

Question HS/MS A.18, 23: In the past 30 days, how often did you miss an entire day of school for any reason? [In-School only]. In the past 30 days, how often did you miss an entire day of remote learning classes for any reason? [Remote only]

Note: Cells are empty if there are less than 10 respondents.

Table A6.3***Reasons for Absence, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply; I didn't miss any school	53	—	—	—
Illness (feeling physically sick), including problems with breathing or your teeth	29	—	—	—
Were being bullied or mistreated at school	1	—	—	—
Felt very sad, hopeless, anxious, stressed, or angry	7	—	—	—
Didn't get enough sleep	5	—	—	—
Didn't feel safe at school or going to and from school	0	—	—	—
Had to take care of or help a family member or friend	5	—	—	—
Wanted to spend time with friends	3	—	—	—
Used alcohol or drugs	0	—	—	—
Were behind in schoolwork or weren't prepared for a test or class assignment	3	—	—	—
Were bored or uninterested in school	4	—	—	—
Had no transportation to school	1	—	—	—
Other reason	26	—	—	—

Question HS/MS A.25, 26: In the past 30 days, did you miss a day of school for any of the following reasons? (Mark All That Apply.) [In-School only]... In the past 30 days, did you miss a day of school from home for any of the following reasons? (Mark All That Apply.) [Remote only]

Notes: Cells are empty if there are less than 10 respondents.

Total percentages may exceed 100% for "mark all that apply" items.

Table A6.4***School Environment, School Connectedness, Academic Motivation, and Promotion of Parental Involvement Scales***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %	Table
Total school supports	59	–	–	–	
Caring relationships-adults in school [‡]	67	–	–	–	A6.5
High expectations-adults in school [‡]	76	–	–	–	A6.6
Meaningful participation at school [‡]	30	–	–	–	A6.7
School connectedness [†]	67	–	–	–	A6.8
School connectedness ^{†ψ} <i>(Remote Only)</i>		–	–	–	A6.8
Academic motivation [†]	66	–	–	–	A6.9
Promotion of parental involvement in school [†]	59	–	–	–	A6.13

Notes: Cells are empty if there are less than 10 respondents.

[‡]Scales are based on average of respondents reporting “Pretty much true” or “Very much true.”

[†]Scales are based on average of respondents reporting “Agree” or “Strongly agree.”

^ψThe scale was based on four questions for remote respondents.

Table numbers refer to tables with item-level results for the survey questions that comprise each scale.

Table A6.5***Caring Relationships Scale Questions***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Caring relationships-adults in school				
<i>Average reporting “Pretty much true” or “Very much true”</i>	67	–	–	–
<i>There is a teacher or some other adult from my school... who really cares about me.</i>				
Not at all true	8	–	–	–
A little true	25	–	–	–
Pretty much true	33	–	–	–
Very much true	34	–	–	–
<i>who notices when I’m not there.</i>				
Not at all true	8	–	–	–
A little true	25	–	–	–
Pretty much true	36	–	–	–
Very much true	32	–	–	–
<i>who listens to me when I have something to say.</i>				
Not at all true	7	–	–	–
A little true	26	–	–	–
Pretty much true	38	–	–	–
Very much true	30	–	–	–

Question HS/MS A.47, 50, 53: There is a teacher or some other adult from my school... who really cares about me... who notices when I’m not there... who listens to me when I have something to say.

Note: Cells are empty if there are less than 10 respondents.

Meaningful Participation Scale Questions

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Meaningful participation at school				
<i>Average reporting “Pretty much true” or “Very much true”</i>	30	–	–	–
<i>At school/When I participate in school,...</i>				
I do interesting activities.				
Not at all true	7	–	–	–
A little true	27	–	–	–
Pretty much true	37	–	–	–
Very much true	30	–	–	–
I help decide things like class activities or rules.				
Not at all true	41	–	–	–
A little true	39	–	–	–
Pretty much true	6	–	–	–
Very much true	14	–	–	–
I do things that make a difference.				
Not at all true	34	–	–	–
A little true	35	–	–	–
Pretty much true	11	–	–	–
Very much true	20	–	–	–
I have a say in how things work.				
Not at all true	46	–	–	–
A little true	34	–	–	–
Pretty much true	10	–	–	–
Very much true	10	–	–	–
I help decide school activities or rules.				
Not at all true	61	–	–	–
A little true	26	–	–	–
Pretty much true	7	–	–	–
Very much true	6	–	–	–

Question HS/MS A.55-64: At school [In-School only],... When I participate in school [Remote only],... I do interesting activities... I help decide things like class activities or rules... I do things that make a difference... I have a say in how things work... I help decide school activities or rules.

Note: Cells are empty if there are less than 10 respondents.

Table A6.8***School Connectedness Scale Questions***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
School connectedness				
<i>Average reporting “Agree” or “Strongly agree”</i>	67	–	–	–
School connectedness^ψ (<i>Remote Only</i>)				
<i>Average reporting “Agree” or “Strongly agree”</i>		–	–	–
I feel close to people at/from this school.				
Strongly disagree	3	–	–	–
Disagree	7	–	–	–
Neither disagree nor agree	19	–	–	–
Agree	42	–	–	–
Strongly agree	30	–	–	–
I am happy with/to be at this school.				
Strongly disagree	7	–	–	–
Disagree	7	–	–	–
Neither disagree nor agree	24	–	–	–
Agree	43	–	–	–
Strongly agree	19	–	–	–
I feel like I am part of this school.				
Strongly disagree	7	–	–	–
Disagree	11	–	–	–
Neither disagree nor agree	19	–	–	–
Agree	51	–	–	–
Strongly agree	11	–	–	–

Question HS/MS A.27-34: How strongly do you agree or disagree with the following statements?... I feel close to people at this school. [In-School only]... I feel close to people from this school. [Remote only]... I am happy to be at this school. [In-School only]... I am happy with this school. [Remote only]... I feel like I am part of this school.... The teachers at this school treat students fairly. [In-School only]... The teachers treat students fairly. [Remote only]... I feel safe in my school. [In-School only]

Notes: Cells are empty if there are less than 10 respondents.

^ψThe scale was based on four questions for remote respondents.

Neither disagree nor agree	23	–	–	–
Agree	41	–	–	–
Strongly agree	23	–	–	–
I feel safe in my school.				
Strongly disagree	4	–	–	–
Disagree	7	–	–	–
Neither disagree nor agree	16	–	–	–
Agree	49	–	–	–
Strongly agree	23	–	–	–

Question HS/MS A.32-34 How strongly do you agree or disagree with the following statements?... The teachers at this school treat students fairly. [In-School only]... The teachers treat students fairly. [Remote only]...I feel safe in my school. [In-School only]

Note: Cells are empty if there are less than 10 respondents.

Table A6.9***Academic Motivation Scale Questions***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Academic motivation				
<i>Average reporting “Agree” or “Strongly agree”</i>	66	–	–	–
I try hard to make sure that I am good at my schoolwork.				
Strongly disagree	1	–	–	–
Disagree	3	–	–	–
Neither disagree nor agree	10	–	–	–
Agree	40	–	–	–
Strongly agree	47	–	–	–
I try hard on my schoolwork because I am interested in it.				
Strongly disagree	11	–	–	–
Disagree	22	–	–	–
Neither disagree nor agree	23	–	–	–
Agree	33	–	–	–
Strongly agree	11	–	–	–
I work hard to try to understand new things when doing my schoolwork.				
Strongly disagree	10	–	–	–
Disagree	7	–	–	–
Neither disagree nor agree	32	–	–	–
Agree	29	–	–	–
Strongly agree	23	–	–	–
I am always trying to do better in my schoolwork.				
Strongly disagree	3	–	–	–
Disagree	4	–	–	–
Neither disagree nor agree	12	–	–	–
Agree	42	–	–	–
Strongly agree	38	–	–	–

Question HS/MS A.41-44: How strongly do you agree or disagree with the following statements?... I try hard to make sure that I am good at my schoolwork... I try hard on my schoolwork because I am interested in it... I work hard to try to understand new things when doing my schoolwork... I am always trying to do better in my schoolwork.

Note: Cells are empty if there are less than 10 respondents.

Table A6.10***Maintaining Focus on Schoolwork***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
It is hard for me to stay focused when doing my schoolwork.				
Strongly disagree	14	–	–	–
Disagree	17	–	–	–
Neither disagree nor agree	23	–	–	–
Agree	28	–	–	–
Strongly agree	18	–	–	–

Question HS/MS A.39: How strongly do you agree or disagree with the following statements?... It is hard for me to stay focused when doing my schoolwork.

Note: Cells are empty if there are less than 10 respondents.

Table A6.11
School Boredom and Value of School

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
School boredom				
Low (0-3)	26	—	—	—
Moderate (4-6)	41	—	—	—
High (7-10)	34	—	—	—
Value of school				
High (0-3)	62	—	—	—
Moderate (4-6)	24	—	—	—
Low (7-10)	14	—	—	—

Question HS/MS A.45, 46: How strongly do you agree or disagree with the following statements?... School is really boring (school boredom)... School is worthless and a waste of time (value of school). Response categories range from 0 (strongly disagree) to 10 (strongly agree).

Note: Cells are empty if there are less than 10 respondents.

Table A6.12
School Boredom Profile Groups

Value of School	School Boredom	Grade 7 %	Grade 9 %	Grade 11 %	NT %
High Value	Low Boredom	24	—	—	—
	Moderate Boredom	28	—	—	—
	High Boredom	9	—	—	—
Moderate Value	Moderate Boredom	9	—	—	—
	High Boredom	15	—	—	—
Low Value	High Boredom	9	—	—	—

Question HS/MS A.45, 46: How strongly do you agree or disagree with the following statements?... School is really boring (school boredom)... School is worthless and a waste of time (value of school). Response categories range from 0 (strongly disagree) to 10 (strongly agree)

Notes: Cells are empty if there are less than 10 respondents.

Students are classified as high on value of school if they selected 0, 1, 2, or 3, moderate if they selected 4, 5, or 6, and low if they selected 7, 8, 9, or 10.

Students are classified as high on school boredom if they selected 7, 8, 9, or 10, moderate if they selected 4, 5, or 6, and low if they selected 0, 1, 2, or 3.

Percentages may not add up to 100% because categories with very low responses are not reported.

Table A6.13***Promotion of Parental Involvement Scale Questions***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Promotion of parental involvement in school				
<i>Average reporting “Agree” or “Strongly agree”</i>	59	–	–	–
Teachers at this school communicate with parents about what students are expected to learn in class.				
Strongly disagree	0	–	–	–
Disagree	11	–	–	–
Neither disagree nor agree	37	–	–	–
Agree	38	–	–	–
Strongly agree	14	–	–	–
Parents feel welcome to participate at this school.				
Strongly disagree	0	–	–	–
Disagree	8	–	–	–
Neither disagree nor agree	32	–	–	–
Agree	43	–	–	–
Strongly agree	17	–	–	–
School staff take parent concerns seriously.				
Strongly disagree	1	–	–	–
Disagree	9	–	–	–
Neither disagree nor agree	23	–	–	–
Agree	49	–	–	–
Strongly agree	19	–	–	–

Question HS/MS A.36-38: How strongly do you agree or disagree with the following statements?... Teachers at this school communicate with parents about what students are expected to learn in class... Parents feel welcome to participate at this school... School staff take parent concerns seriously.

Note: Cells are empty if there are less than 10 respondents.

1 time	0	–	–	–
2 to 3 times	1	–	–	–
4 or more times	1	–	–	–

Question HS A.75, 76/MS A.73: During your life, how many times have you used the following?... Cold/cough medicines or other over-the-counter medicines to get “high”... Any other drug, pill, or medicine to get “high” or for reasons other than medical.

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

Table A9.4***Methods of Marijuana Consumption***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
<i>During your life, how many times have you used marijuana in any of the following ways...</i>				
Smoke it?				
0 times	100	—	—	—
1 time	0	—	—	—
2 to 3 times	0	—	—	—
4 or more times	0	—	—	—
In a vaping device?				
0 times	100	—	—	—
1 time	0	—	—	—
2 to 3 times	0	—	—	—
4 or more times	0	—	—	—
Eat or drink it in products made with marijuana?				
0 times	100	—	—	—
1 time	0	—	—	—
2 to 3 times	0	—	—	—
4 or more times	0	—	—	—
<i>Ever used marijuana in all three ways</i>	0	—	—	—

Question HS A.69, 80-82/MS A.70, 77-79: During your life, how many times have you used the following?... Marijuana (smoke, vape, eat, or drink)... During your life, how many times have you used marijuana in any of the following ways... Smoke it?... In a vaping device (vape pens, mods, or portable vaporizers)?... Eat or drink it in products made with marijuana?

Note: Cells are empty if there are less than 10 respondents.

Table A9.5***Current AOD Use, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one or more drinks of alcohol)	3	—	—	—
Binge drinking (5 or more drinks in a row)	1	—	—	—
Marijuana (smoke, vape, eat, or drink)	0	—	—	—
Inhalants	1	—	—	—
Prescription drugs to get “high” or for reasons other than prescribed	na	—	—	—
Other drug, pill, or medicine to get “high” or for reasons other than medical	0	—	—	—
<i>Any drug use</i>	1	—	—	—
<i>Heavy drug use</i>	0	—	—	—
<i>Any AOD Use</i>	3	—	—	—
Two or more substances at the same time	na	—	—	—

Question HS A.86-92/MS A.83-87: During the past 30 days, on how many days did you use... one or more drinks of alcohol?... five or more drinks of alcohol in a row, that is, within a couple of hours?... marijuana (smoke, vape, eat, or drink)?... inhalants (things you sniff, huff, or breathe to get “high”)?... prescription drugs to get “high” or for reasons other than prescribed?... any other drug, pill, or medicine to get “high” or for reasons other than medical?... two or more substances at the same time (for example, alcohol with marijuana, ecstasy with mushrooms)?

Notes: Cells are empty if there are less than 10 respondents.

Heavy drug use was calculated based on pattern of combined current drug use on three or more days (marijuana, inhalants, prescription pain medicine to get “high” (high school only), or any other illegal drug/pill to get “high”). na—Not asked of middle school students.

Table A9.6***Frequency of Current AOD Use, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one or more drinks)				
0 days	97	—	—	—

3 to 9 days	0	–	–	–
10 to 19 days	0	–	–	–
20 to 30 days	0	–	–	–

Question HS A.93-95/MS A.88-90: During the past 30 days, on how many days on school property did you... smoke cigarettes?... use smokeless tobacco (dip, chew, snuff, snus, or nicotine pouches)?... vape?

Note: Cells are empty if there are less than 10 respondents.

Table A10.10***Substances Vaped on School Property, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Vaped tobacco or nicotine				
0 days	100	—	—	—
1 or 2 days	0	—	—	—
3 to 9 days	0	—	—	—
10 to 19 days	0	—	—	—
20 to 30 days	0	—	—	—
Vaped marijuana or THC				
0 days	100	—	—	—
1 or 2 days	0	—	—	—
3 to 9 days	0	—	—	—
10 to 19 days	0	—	—	—
20 to 30 days	0	—	—	—
Vaped other product				
0 days	100	—	—	—
1 or 2 days	0	—	—	—
3 to 9 days	0	—	—	—
10 to 19 days	0	—	—	—
20 to 30 days	0	—	—	—

Question HS A.95, 95A-95C/MS A.90, 90A-90C: During the past 30 days, on how many days on school property did you... vape?... vape tobacco or nicotine?... vape marijuana or THC?... vape other product?

Note: Cells are empty if there are less than 10 respondents.

Table A10.11***Vaped Multiple Substances on School Property, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Did not vape tobacco/nicotine or marijuana/THC	100	—	—	—
Vaped tobacco or nicotine only	0	—	—	—
Vaped marijuana or THC only	0	—	—	—
Vaped tobacco/nicotine and marijuana/THC	0	—	—	—

Question HS A.95, 95A, 95B/MS A.90, 90A, 90B: During the past 30 days, on how many days on school property did you... vape?... vape tobacco or nicotine?... vape marijuana or THC?

Note: Cells are empty if there are less than 10 respondents.

Table A10.12***Current Tobacco Use on School Property, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	100	–	–	–
Yes	0	–	–	–

Question HS A.93-95, 95A/MS A.88-90, 90A: During the past 30 days, on how many days on school property did you... smoke cigarettes?... use smokeless tobacco (dip, chew, snuff, snus, or nicotine pouches)?... vape?... During the past 30 days, on how many days on school property did you... Vape tobacco or nicotine.

Notes: Cells are empty if there are less than 10 respondents.

Current tobacco use includes using cigarettes or smokeless tobacco, or vaping tobacco or nicotine.

Table A10.13***Secondhand Smoke on School Property, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Breathed the smoke or vapor from someone who was using cigarettes or e-cigarettes				
0 days	97	–	–	–
1 day	1	–	–	–
2 days	1	–	–	–
3-9 days	0	–	–	–
10-19 days	0	–	–	–
20-30 days	0	–	–	–

Question HS A.99/MS A.94: During the past 30 days, on how many days on school property did you... breathe the smoke or vapor from someone who was using cigarettes or e-cigarettes?

Note: Cells are empty if there are less than 10 respondents.

Table A10.14***Cigarette Smoking and Vaping Cessation Attempts***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply, don't use	na	—	—	—
0 times	na	—	—	—
1 time	na	—	—	—
2 to 3 times	na	—	—	—
4 or more times	na	—	—	—

Question HS A.65, 67, 113: During your life, how many times have you used the following? A whole cigarette... Vape products... How many times have you tried to quit or stop using... smoking or vaping tobacco or nicotine?

Notes: Cells are empty if there are less than 10 respondents.

Respondents reporting "0 Times" on lifetime cigarette or vape product use are coded as "Does not apply, don't use" on cigarette smoking and vaping cessation attempts.

na—Not asked of middle school students.

Table A10.15***Perceived Harm of Cigarette Smoking***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Smoke cigarettes occasionally				
Great	31	—	—	—
Moderate	42	—	—	—
Slight	11	—	—	—
None	15	—	—	—
Smoke 1 or more packs of cigarettes each day				
Great	70	—	—	—
Moderate	10	—	—	—
Slight	3	—	—	—
None	17	—	—	—

Question HS A.100, 101/MS A.95, 96: How much do people risk harming themselves physically and in other ways when they do the following?... Smoke cigarettes occasionally... Smoke 1 or more packs of cigarettes each day.

Note: Cells are empty if there are less than 10 respondents.

Table A10.16***Perceived Harm of Vaping Tobacco or Nicotine***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Vape tobacco or nicotine occasionally				
Great	42	–	–	–

Table A12.7***Social and Emotional Health by Race/Ethnicity – Continued***

	Grade 7	Grade 9	Grade 11	NT
California Student Wellness Index^o				
American Indian or Alaska Native		–	–	–
Asian or Asian American		–	–	–
Black or African American		–	–	–
Hispanic or Latino/a	101.2	–	–	–
Native Hawaiian or Pacific Islander		–	–	–
White	104.1	–	–	–
Multiracial		–	–	–
Something else		–	–	–

Notes: Cells are empty if there are less than 10 respondents.

^o*To construct the index, the ten items that comprise both the social emotional distress and life satisfaction scales were each recoded such that the lowest possible score on each item was zero. These scores were then added together, resulting in a total raw score that could vary between 0 and 40. To calculate the scale score for the Student Wellness Index, the raw score was divided by the maximum possible score (40). Additionally, for clearer comparisons across groups and for interpreting future trends across time, a standardized version of the Student Wellness Index was constructed based on statewide data from the 2021-23 Biennial State CHKS. The standardized score (presented in the table) is scaled to have a mean score of 100 and a standard deviation of 15.*

Notes: Cells are empty if there are less than 10 respondents.

[‡]Average percent of respondents reporting “Satisfied” or “Very satisfied” across survey questions that comprise the scale.

[∘]To construct the index, the ten items that comprise both the social emotional distress and life satisfaction scales were each recoded such that the lowest possible score on each item was zero. These scores were then added together, resulting in a total raw score that could vary between 0 and 40. To calculate the scale score for the Student Wellness Index, the raw score was divided by the maximum possible score (40). Additionally, for clearer comparisons across groups and for interpreting future trends across time, a standardized version of the Student Wellness Index was constructed based on statewide data from the 2021-23 Biennial State CHKS. The standardized score (presented in the table) is scaled to have a mean score of 100 and a standard deviation of 15.

Notes: Cells are empty if there are less than 10 respondents.

^oTo construct the index, the ten items that comprise both the social emotional distress and life satisfaction scales were each recoded such that the lowest possible score on each item was zero. These scores were then added together, resulting in a total raw score that could vary between 0 and 40. To calculate the scale score for the Student Wellness Index, the raw score was divided by the maximum possible score (40). Additionally, for clearer comparisons across groups and for interpreting future trends across time, a standardized version of the Student Wellness Index was constructed based on statewide data from the 2021-23 Biennial State CHKS. The standardized score (presented in the table) is scaled to have a mean score of 100 and a standard deviation of 15.

Notes: Response rates are presented by grade level. Eligible schools listed are based on CBEDS 2024-25 public school and 2023-24 enrollment data files. Directly funded charter schools have been excluded from the list.

Appendix II

CHKS Content Overview, 2024-25

This brief guide to key CHKS Core Module indicators is designed to help survey users more easily understand and interpret their findings.¹ References are provided to the tables in CHKS reports where results for the indicators discussed can be found. References are also made to other relevant CHKS reports, factsheets, and resources that can be downloaded from the CalSCHLS website (calschls.org) for further information. What Works Briefs that provide guidance on best practices related to areas assessed by the survey are available from the California Safe and Supportive Schools website (ca-safe-supportive-schools.wested.org/resources).

Special attention is directed toward indicators related to the requirements of California’s Local Control and Accountability Plans (LCAP). For a summary of state-level LCAP-related baseline CHKS data, see Factsheet #15.²

MAIN CONTENT FOCUS: SCHOOL CLIMATE AND THE NEEDS OF THE WHOLE CHILD

The main purpose of the CHKS Core Module is to assess indicators of school climate, pupil engagement, and student supports, all three key priorities required of the LCAP. It provides schools with essential data to determine the degree to which they provide the conditions and supports that all youth need to succeed in learning and developmentally thrive. Forty-nine items assessing 14 school climate domains included in a *School Climate Report Card (SCRC)*.³ All districts receive a district-level SCRC and can request school-level SCRCs. The items used in the SCRC assess school connectedness, developmental supports (e.g., caring adult relationships), and safety, including bullying and victimization.

School climate, as measured by the CHKS, is strongly related to student learning and academic performance. Data for high school students show that as school climate improves—as the schools became safer, more supportive, and more engaging—academic performance increased as well.⁴

In a ground-breaking analysis, a positive school climate was a distinguishing characteristic of California secondary schools that “beat the odds” academically and consistently performed better on the state’s standardized tests than *would be predicted* based on the characteristics of their students (i.e., comparing schools with similar student demographics). The more positive the school climate, the greater the probability there was for beating the odds. School climate was more strongly associated with beating the odds than a school’s level of personnel resources.⁵

In addition, the CHKS Core Module provides data to help understand the degree to which schools address the needs of the whole child. CHKS data show that California secondary schools made greater progress in raising standardized test scores over a one-year period when they had higher percentages of students who reported: (1) being less engaged in risky behaviors such as substance use and violence; (2) being more likely to eat nutritiously and exercise; and (3) experiencing caring adult relationships and high

¹ To see how local results compare with state averages in California, download a copy of the latest Biennial State CHKS report (calschls.org/reports-data/#state-level_reports). The Biennial State data are derived from a randomly-selected, representative state sample. County-level reports are also available on the CHKS website. Biennial State CHKS and county-level data can also be examined interactively on the CalSCHLS Data Dashboard (calschls.org/reports-data/dashboard).

expectations at school.⁶ These results suggest that addressing the health and developmental needs of youth is a critical component of a comprehensive strategy for meeting accountability demands for improved academic performance.

GRADE-LEVEL PATTERNS

More than 20 years of survey administration has demonstrated that as youth progress through secondary school, they become: (1) less likely to report feeling connected to school and being academically motivated; and (2) more likely to report truancy, involvement in substance use, and chronic sadness and hopelessness. Here are some additional grade-level patterns in CHKS data:

- **Seventh graders** report the highest rates of harassment and victimization, as well as participation in a physical fight and seeing a weapon on campus.
- **Ninth graders** report the lowest rates of developmental support.
- **Nontraditional (continuation school) students** report risk behavior (e.g., binge drinking, fighting at school) prevalence rates at least twice those of 11th graders in traditional comprehensive high schools.⁷ They also exhibit lower perceived school safety, school connectedness, and developmental supports. Continuation school students are a highly vulnerable population in need of a wide range of academic, social, emotional, and behavioral supports and intervention services.⁸

DEMOGRAPHIC CHARACTERISTICS AND POPULATION GROUP DIFFERENCES (Section 3)

Indicators of the demographic and background characteristics of the survey respondents help users gain a better sense of how representative the survey sample is compared to the student population overall. They also enable users to analyze how survey results vary by important groups in the school and help them to identify, and target programs for, youth most in need. School districts can use these data to meet LCAP requirements to demonstrate actions across state priorities in regard to socioeconomically disadvantaged students, English learners, and foster youth, as well as other indicators such as race/ethnicity, homeless youth, and LGBTQ youth.

In the standard CHKS report, breakdowns for selected key indicators are provided by all the LCAP priority groups such as race/ethnicity, gender, parental education, English learner and long-term English learner status, disability status, foster youth, and unhoused youth. For selected key indicators, the CalSCHLS Data Dashboard (data.calschls.org/reports-data/dashboard) can be used to display group differences across these same groups as well as additional groups (e.g., chronic sadness, caring relationships). Districts/schools can also subscribe to the District CalSCHLS private data dashboard to disaggregate their CHKS results by these groups for each school (email calschls@wested.org).

Racial-Ethnic Group Identification

Respondents self-report their identification with six racial/ethnic groups. In one study of CHKS data, both academic performance and school well-being—the degree to which students feel safe at, supported by, and connected to the school—varied consistently and persistently across schools by racial/ethnic groupings.⁹ They were highest in schools with large proportions of white and Asian students, as well as

⁶ Hanson & Austin. (2003). Download data.calschls.org/resources/FACTSHEET-3.pdf

⁷ In interpreting the results for 11th graders, note that many youth who are most disengaged and involved in high risk behaviors may have already dropped out of school or did not participate in the survey because of truancy or absenteeism.

⁸ Austin, Dixon, & Bailey. (2007). Download data.calschls.org/resources/FACTSHEET-7.pdf

⁹ Austin, Hanson, Bono, & Zheng. (2008). Download data.calschls.org/resources/factsheet_8.pdf

in middle- and high-income schools. Controlling for socioeconomic status and other school demographic characteristics reduced these racial/ethnic group differences, but the disparities still remained. This suggests that school climate factors related to student well-being may also play a role in racial/ethnic group differences in achievement. One strategy to close the gap may be to enhance learning supports that foster caring adult relationships, high expectations, meaningful participation, safety, and connectedness in schools serving large proportions of low-income African American and Hispanic students.

In the majority of cases, with notable exceptions for Asians, *the racial/ethnic gaps in performance, engagement, perceived support, and safety are greater within-schools than between-schools*.¹⁰ White students feel more safe, engaged, and supported than their African American, Hispanic, and Asian peers *within the same school*.¹¹ Inequities in these factors can possibly contribute to the achievement differences. Further, these findings suggest that practices designed to ensure equitable access to academic resources, opportunities, learning supports, and promotion of common experiences may be effective in ameliorating the gap.

Youth in Foster Care

Compared to youth who live with their parents, youth in foster care settings report much higher rates of substance abuse, poor school attendance and grades, more violence-related behaviors, more harassment, and higher depression risk.^{12 13} They were also more likely to be low in caring adult relationships and total developmental support.

Unhoused Youth

Homeless youth are substantially more likely than other youth to engage in substance use, have lower attendance at school and struggle with academic performance, feel less safe at school and experience greater levels of harassment and bullying, and exhibit higher levels of chronic sadness.¹⁴ Like youth in foster care, unhoused youth were also more likely to be low in caring adult relationships at school.

Sexual Orientation and Gender Identity

Lesbian, gay, bisexual, transgender, and questioning or queer (LGBTQ) youth are at elevated risk for bullying and violence victimization, mental health problems, drug and alcohol use, and exhibiting poor performance in school.^{15 16} For example, analysis of the Biennial State CHKS data indicate that LGBTQ youth¹⁷ are:

- about 30 percentage points more likely than non-LGBTQ youth to experience harassment and bullying at school;
- 30-to-40 percentage points more likely to exhibit chronic sadness;
- 2-to-3 times more likely to smoke cigarettes, binge drink, and to have been drunk or high at school; and

¹⁷ See calschls.org/my-surveys/

- receive substantially fewer social supports from teachers and peers at school than their counterparts who do not identify as LGBTQ.

Because of such disparities, it is important to examine disparities across LGBTQ and non-LGBTQ youth to identify needs and support the development of practices that promote the healthy development and safety of all youth.

SCHOOL PERFORMANCE, ENGAGEMENT, AND SUPPORTS (Section 6)

A major focus of the CHKS is providing data to gauge the level of pupil engagement, an LCAP state priority on which districts are required to show improvement. Enhancing student engagement has been identified as the key to addressing problems of low achievement, high levels of student misbehavior, alienation, and high dropout rates.¹⁸ CHKS and other surveys consistently show that as youth progress through the school system, indicators of engagement decline.

It is important to look at engagement from three perspectives: behavioral, emotional, and cognitive. The CHKS provides data on all three types. As discussed below, the Academic Motivation scale, school boredom, and self-reported grades provide insight into cognitive engagement; the School Connectedness scale and school value item into emotional engagement; and attendance data into behavioral engagement. Another behavioral engagement indicator on the survey is substance use at school. Research shows that student engagement is malleable and that all three types of engagement are influenced by the level to which students perceive the school as having a positive environment.

The CHKS Developmental Supports scales provide insight into whether students experience three protective factors in their school (caring relationships, high expectations, and opportunities for meaningful participation). These protective factors characterize a positive school climate and are linked to school connectedness and positive academic, behavioral, and health outcomes. Other school climate factors assessed are the level of parent involvement and the quality of the school physical environment, both also LCAP priorities. The likelihood that students will be motivated and engaged is increased to the extent that their teachers, family, and friends effectively support their purposeful involvement in learning and in school.

Self-Reported Grades

The CHKS asks students to indicate what grades they received in school in the past 12 months. Although self-reports are not as accurate as actual report card data, they provide a general sense of the school performance of the survey respondents from their self-perception.

Academic Motivation

A four-item scale gauges student academic motivation by asking how strongly they agree that they try hard to do well on schoolwork, try hard because they are interested in the work, work hard to understand new things at school, and always try to do better. On the 2019-21 State CHKS, the percentage of students agreeing with the questions on this scale ranged from 64 percent in 11th grade to 71 percent in 7th.¹⁹

In order to achieve rigorous academic goals, students need not only a challenging and engaging curriculum, but they need to be emotionally connected to their learning. Student perceptions of the school environment and their degree of school connectedness influence their achievement motivation. But students may be behaviorally and/or emotionally invested in a given activity without actually exerting the

¹⁸ Wang, M-T, & Eccles, J. (2013). School context, achievement motivation, and academic engagement: A longitudinal study of school engagement using a multidimensional perspective. *Learning and Instruction*, 28, 12-23. <https://doi.org/10.1016/j.learninstruc.2013.04.002>

¹⁹ Download data.calschls.org/resources/Biennial_State_1921.pdf

necessary mental effort to understand and master the knowledge, craft, or skill that the activity promotes. This scale provides insight into the overall level of that mental effort.

In addition, the supplementary School Climate Module includes Student Learning Environment and Learning Engagement Climate scales and a series of questions about supports for learning and academic rigor.

School Boredom – School Value

Boredom is commonly experienced among secondary students, but its meaning and effects vary from student to student. Student boredom can be associated with specific subjects and academic tasks or it can be a pervasive response to school activities. Frequent boredom is associated with poor academic and mental health outcomes. Two CHKS questions ask about students’ school boredom (school is really boring) and how much they value their schooling experience (school is worthless and a waste of time). Combined, these two survey questions are used to identify School Boredom Mindset Profiles.^{20,21,22}

		School Boredom												
		School is really boring												
		Low Boredom				Moderate Boredom			High Boredom					
		0 Disagree	1	2	3	4	5	6	7	8	9	10 Agree		
Value of School	School is worthless, a waste of time	High Value	0 Disagree	1 Optimal				2			3			
			1	High Value–Low Boredom				High Value–Moderate Boredom			High Value–High Boredom			
			2	Students did not think school was boring and valued school highly				Students valued school highly with moderate-level school boredom			Students indicated school was very boring, yet they valued it highly			
		3												
		Moderate Value	4	4				5			6			
			5	Moderate Value–Low Boredom				Moderate Value–Moderate Boredom			Moderate Value–High Boredom			
	6						Students with moderate-level school boredom and school value			Students indicated school was very boring, and valued it at a moderate level				
	Low Value	7								Suboptimal				
		8	7				8			9				
		9	Low Value–Low Boredom				Low Value–Moderate Boredom			Low Value–High Boredom				
	10 Agree								Students indicated school was very boring, and valued it at a very low level					
	Only a low percentage of students’ responses place them in groups 4, 7, and 8.

²¹ Branstetter, R. (2021). What do kids mean when they say they’re bored at school? Greater Good Magazine. https://greatergood.berkeley.edu/article/item/what_do_kids_mean_when_they_say_theyre_bored_at_school

²² See D. Michael Furlong’s RISE 360 School Boredom Resource to learn more about school boredom and how these two items are combined to identify School Boredom Mindset Profiles https://rise.articulate.com/share/evs7SLqtz3xvWkgVnQjW6YNu1vFyRm6_#/

Students with high school boredom and low school-value, a suboptimal profile, report substantially poorer well-being than students with low boredom combined with elevated school-value, an optimal profile. Moreover, students with high school boredom and high school-value may be experiencing episodic or task-specific boredom, which requires different types of support than students who exhibit the suboptimal pattern. The percentage of students falling in each of these profile groups is presented in the CHKS report so that school personnel can monitor the boredom experiences of students to best address their academic and social-emotional needs.

Absenteeism

Before good teachers with quality curriculums and engaging activities can improve academic performance, the students have to show up. The CHKS provides data to identify what proportion of respondents are at risk of chronic absenteeism (missed 3 or more days during the past 30 days) and what were the reasons for absences.

Poor attendance is a marker of a wider variety of other problems, including low school connectedness and learning engagement. Both the US Department of Education and the California Office of the Attorney General have launched initiatives designed to raise awareness about and combat chronic absenteeism, generally defined as missing 10 percent of school days. According to a report by Attendance Works, the nation’s large and persistent achievement gaps are rooted in a largely hidden crisis of chronic absenteeism, especially among low-income and minority children.²³

Biennial State CHKS data indicate that the most common reasons for being absent in secondary school, after illness, are generally not getting enough sleep and anxiety or stress, followed by being behind in schoolwork, and being bored or uninterested in school, another good indicator of disengagement.²⁴

Developmental Supports

Research shows that when schools (or families or communities) provide three developmental supports—**caring adult relationships, high expectations, and opportunities for meaningful participation**—students are more likely to report more positive academic, social-emotional, and health outcomes, including higher grades, school connectedness, attendance, and perceived safety. CHKS measures these supports using multi-item scales. Results overall suggest that the great majority of students do not receive sufficient levels of support and that the supports received are lower in high school than in middle school, even though student need for them is arguably higher.^{25 26 27 28 29 30}

School Connectedness

School connectedness is one of the indicators of school climate that a California school district must address in its LCAP. Research shows that school connectedness is associated with multiple positive

academic, social-emotional, and health outcomes.³¹ It also shows that youth who feel safe at school, experience caring adults, and have opportunities for engagement and other developmental supports are more likely to feel connected to the school. The CHKS five-item School Connectedness scale is an important differentiator between low-performing and high-performing high schools and has value as an indicator of school quality. The online Query CalSCHLS system (calschls.org/reports-data/query-calschls/) enables examination of how key survey indicators vary by school connectedness.

School connectedness declines markedly after elementary school. A substantial minority of middle and high school students are not connected to their schools. On the 2017-19 State CHKS, the average percentage of students agreeing to these scale questions declined from 62 percent in 7th grade to 53 percent in 11th, a decline similar to that found for the Academic Motivation scale.³² This may be related at least in part to their lower levels of developmental support. Prior analyses have indicated that the lowest rates of both connectedness and test scores are in low-income schools.^{33 34}

Parent Involvement

Parent involvement, including promoting parental participation in school programs, is one of the LCAP state priorities. A three-item scale assesses student perceptions (level of agreement) of three components of parent involvement: teachers communicating with parents about what students are expected to learn in class, parents feeling welcome to participate at this school, and school staff taking parent concerns seriously. The same questions also are asked on the staff and parent surveys so that perceptions can be compared across all three stakeholder groups. A large and growing body of evidence has linked school success to the manner and degree to which a school communicates with parents, engages them both in school activities and education, and fosters a school climate that parents perceive as warm, inviting, and helpful.³⁵

Facilities and Physical Environment

As an indicator of student perceptions of the school's physical environment, the CHKS includes a question asking students how much they agree the school "is usually clean and tidy." Additional questions are included in the supplementary School Climate Module. An analysis of 2018/20 data from the questions on both modules found that a plurality of students report that their school facilities are in good condition, but a non-trivial minority of students were dissatisfied with the condition of their school facilities.³⁶ Between 20 percent and 25 percent of students disagree or strongly disagree on the quality of the physical environment items. Almost one-third of schools serving 11th graders were categorized as having low quality physical environments based on student reports on the clean and tidy item. Student perceptions of the quality of their school's physical environment were strongly related to student achievement.

SCHOOL VIOLENCE, VICTIMIZATION, AND SAFETY (Section 8)

The CHKS asks students a wide range of questions to ascertain the scope and nature of physical and verbal violence and victimization that occurs on campus, as well as vandalism, and the overall level of school

safety.³⁷ Physical violence and weapons on campus have long been a major public concern. Equally disruptive are the uncounted acts of bullying, teasing, and other nonviolent misbehavior among youth, such as substance use and sales on campus.³⁸ These behaviors adversely affect not only students' ability to learn and willingness to attend school, but also the overall school environment, the ability of teachers to teach, and the willingness of adults to enter the teaching profession.^{39 40 41}

Perceived Safety

Perceived safety is another indicator that districts/schools are required to monitor as part of their LCAP school climate priority. School safety is more than the antithesis of violence. Perceived school safety is psychological as well as physical. Feelings of insecurity can have multiple sources, not all of which correctly reflect the level of danger and violence on a school campus, such as verbal bullying. Both physical and psychological safety are essential for high quality teaching and learning. It is a key factor in students feeling connected to school. Another indicator important for attendance is the percentage of students who report missing school because they didn't feel safe (Table A6.3).

If students report low levels of perceived school safety, further examination of all the indicators related to bullying and victimization is warranted. Consider conducting follow-up student voice and feedback sessions such as focus groups or Student Listening Circles and integrating questions on why students do not feel safe.⁴²

Harassment and Victimization

Most of the safety-related questions on the survey assess victimization. Because a relatively small number of students can victimize a large number of their peers, victimization questions provide important insight into the overall school climate. Nonviolent harassment in any form—threats, intimidation, rumors, and ostracism—can instill a sense of vulnerability, isolation, frustration, and fear among its victims, leading to engagement in health risk behaviors or avoidance behaviors such as missing school and social isolation. This type of misbehavior, vastly more common than any other, ruins the school day for many students.

The CHKS asks about the frequency with which students experienced any bullying/harassment related to six bias-related categories (gender, race/ethnicity, disability, sexual identity, religion, immigrant status), as well as for any other reason (Table A8.2). About three-in-ten secondary students report experiencing some harassment in the past year on the 2017-19 State CHKS, with the percentages declining between 7th and 11th grades.⁴³ Analyses show that victims of harassment are more likely to not feel safe at, and connected to, school; to have higher truancy; and to experience lower developmental (resilience) supports at school.^{44 45} They report higher rates of fighting and weapons possession at school, as well as risk of depression. Students who report bias-related harassment, particularly for disability and sexual orientation, have poorer well-being than students who were only harassed for other reasons.

Different forms of verbal harassment at school are assessed by asking students about: mean rumors or

³⁷ The CHKS also includes two violence-related questions that are not school based: the frequency students experienced cyberbullying and whether they are gang members.

lies; sexual-related jokes, comments, or gestures; being made fun of because of looks or speech; and, more generally, being made fun of, insulted or called names. Physical victimization is assessed by questions about having been pushed/shoved, threatened with harm or injury (without or without weapon), and being afraid of being beaten up. Students are also asked whether they have ever been in a physical fight as a measure of general violence.

The supplementary School Climate Module includes Bullying Prevention and Respect for Diversity scales to provide insight into what the school is doing to reduce the problem.

Vandalism and Weapons

Two other safety-related areas assessed by the survey are school vandalism and weapons possession. Students are asked whether they damaged school property or had their property damaged at school and whether they carried a knife or other weapon to school or observed someone else doing these things.⁴⁶ Overall, weapons possession is not common. Statewide, only about two percent of secondary students report carrying a gun and 4-5 percent report carrying another weapon.⁴⁷ About 14 percent of 7th and 9th graders report seeing someone carrying a weapon compared to 11 percent of 11th graders.

SUBSTANCE USE (Sections 9 and 10)

An important barrier to learning, positive youth development, and health, substance use is assessed by the CHKS Core.

Alcohol and Other Drug Use (Section 9)

The misuse of alcohol and other drugs (AOD) continues to be among the most important issues confronting the nation. For schools, the problem is particularly relevant. Years of research have shown that adolescent substance use is closely connected to academic performance and contributes to raising the level of truancy and absenteeism, special education, disciplinary problems, disengagement and dropout rates, teacher turnover, and property damage.

Reflecting this, on the California School Staff Survey, 39 percent of high school staff statewide reported that alcohol and drug use are a moderate to severe problem at their school.⁴⁸

Alcohol and Other Drug Use at School (Section 9)

AOD use at school is especially troubling. This is behavior that threatens not only the user's learning ability but also the school's efforts to educate all youth. It also is an indirect indicator of school disengagement. An analysis of CHKS data found that substance use and intoxication at school, being offered drugs at school, and lifetime intoxication were significantly related to changes in California achievement test scores one year later.⁴⁹ Schools with proportionately large numbers of students who reported these behaviors exhibited smaller gains in test scores than other schools.^{50 51}

Cigarette Smoking (Section 10)

Students who report smoking cigarettes are significantly more likely than those who do not to engage in alcohol and other drug use, be involved in violence and gang membership, and experience school-related

⁴⁶ Students who participated in school exclusively via remote learning were not asked these questions in 2020-21.

⁵¹ O'Malley & Amarillas. (2011). Download data.calschls.org/resources/S3_WhatWorksBrief8_AOD_final.pdf

problems and disengagement. To a lesser extent, students who smoke are also more likely to be victims of violence and harassment, feel unsafe at school, and experience incapacitating sadness and loneliness. These results suggest that efforts to reduce student smoking may be more successful if embedded in approaches that address a broad range of risk behaviors and problems.^{52 53}

SOCIAL AND EMOTIONAL HEALTH (Section 7)

Student mental health can have a big impact on their health and well-being. The CHKS Core provides four measures for assessing mental health among students: (1) whether they experience chronic, incapacitating sadness or hopelessness; (2) whether they ever contemplated suicide; (3) social and emotional distress; and (4) life satisfaction. Students who experience chronic sadness, compared to their peers who do not, are at elevated risk of a wide range of educational, health, social, and emotional problems, including lower school attendance, performance, and connectedness.⁵⁴ They also report lower levels of the developmental supports in their schools and communities that have been shown to mitigate these problems. Similar findings are found among youth who have contemplated suicide.⁵⁵

CHKS data also show that students who report bias-related harassment, particularly for disability and sexual orientation, have poorer overall mental health than students who are harassed for other reasons or not harassed. Students who report any harassment are about twice as likely to experience chronic sadness/hopelessness than their non-harassed peers.^{56 57}

See also the percentage of students who report missing school because they “felt very sad, hopeless, anxious, stressed, or angry.” In addition, the supplementary School Climate Module includes a Social and Emotional Supports scale that provides insight from students on what the school does to help promote mental health and foster social-emotional competencies.
